The diagram shows an 'Execute SQL Task' connected to a 'Data Flow Task' via a green arrow. The 'Execute SQL Task' is a rectangular box with a database icon, and the 'Data Flow Task' is a rounded rectangular box with a database icon. A green arrow points from the bottom of the 'Execute SQL Task' to the top of the 'Data Flow Task'.

The screenshot shows the Microsoft SQL Server Enterprise Manager interface. The left pane displays the 'Object Explorer' with the 'ChinookDW' database selected. The right pane shows the 'SQLQuery3.s...RNI\ab (53))' window with the query 'select * from DimGenre' executed. The results are displayed in a table with 8 rows and 4 columns: GenreSK, GenreId, Name, and an empty column. The status bar at the bottom indicates 'Query executed successfully.' and 'Row: 1, Col: 1 | 25 rows'.

	GenreSK	GenreId	Name	
1	1	1	Rock	
2	2	2	Jazz	
3	3	3	Metal	
4	4	4	Alternative & Punk	
5	5	5	Rock And Roll	
6	6	6	Blues	
7	7	7	Latin	
8	8	8	Reggae

Data Flow Task: Data Flow Task

The diagram illustrates a Data Flow Task within an SSIS package. It begins with an 'OLE DB Source' at the top, which connects to a 'Lookup(DimTrack)' transform. The output of this lookup is labeled 'Lookup Match Output' and flows into a second 'Lookup(DimPlaylist)' transform. This second lookup also has a 'Lookup Match Output' that connects to an 'OLE DB Destination' at the bottom. The entire flow is contained within a 'Data Flow Task' container. A zoom slider on the right indicates the diagram is at 100% scale.

Data Flow Task: Data Flow Task

The diagram illustrates a Data Flow Task within an SSIS package named 'FactInvoice.dtsx'. It begins with two source components, 'Invoice' and 'InvoiceLine', which feed into 'Sort' and 'Sort 1' tasks respectively. The outputs of these sort tasks are then joined by a 'Merge Join' task. Following the merge, the data flows through a series of lookup tasks: 'Lookup(DimCustomer)', 'Lookup(DimTrack)', 'Lookup(DimGeo)', and 'Lookup(Date)'. Each lookup task is connected to the previous one via 'Lookup Match Output' paths. The final output of the 'Lookup(Date)' task is directed to an 'OLE DB Destination' task. The 'Connection Managers' pane at the bottom shows two connections: 'LocalHost.Chinook' and 'LocalHost.ChinookDW'.
